

PUBLIC TRANSPARENCY REPORT

2025

Stefnir

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Responsible and diverse investment options and thorough disclosure of information are central to the corporate social responsibility to which Stefmir is committed. By paying due attention to environmental and social issues and good corporate governance we believe we can have a positive influence on our society, to the benefit of fund members and other stakeholders. The main differences of Stefmir's approach to responsible investments can be seen clearly in how we actively engage with equity issuers however historically in Iceland fixed income issuers that are not already equity issuers particularly SSA bonds have been hard to approach through stewardship.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

As a signatory to the PRI, Stefmir has pledged to introduce and implement rules on responsible investment. Under these rules environmental, social and governance issues form part of the decision-making process on investments. Stefmir is a founding member of IcelandSIF, an initiative designed to develop and add to the knowledge and debate on responsible investment. Stefmir was one of many organizations in Iceland which signed a declaration of intent with the government on investment for sustainable development. In the year 2023 the BoD of Stefmir approved a new policy on RI, the policy highlights how important Stefmir is taking ESG into all investment processes. Stefmir has formed an ESG committee The ESG committee works in accordance with rules of procedure, provides support on asset allocation and assurance that Stefmir works in accordance with the established criteria on responsible investment. All of Stefmir's staff and BoD have the option to undertake foundational and advanced courses by the PRI Academy.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Continued integration of ESG aspects to all decision making within the company. Be a leader in offering responsible investment options. The next two years will be crucial both with the implementation process of ESG within the company investment processes but also enhancing and supporting all awareness on RI in Iceland.
