What is this product?

Type

The fund is an alternative investment fund marketed towards the public pursuant to the Alternative Investment fund Managers Act No. 45/2020. Alternative investment funds marketed towards the public have broader investment authorizations than UCITS. The fund's investment authorizations are specified in the section on investment strategy in its prospectus. The fund's ID-No. is 591110-9930.

Objectives

The fund's objective is to generate good returns and to spread risk by investing in a mixed portfolio of international securities. The fund invests in foreign bonds, equities and other foreign funds that are considered to represent the best investment options at any given time. The focus is on investing in funds rather than individual securities.

Intended retail investor

The fund is aimed at clients of Arion Bank - Private Banking. The fund is designed for both the general public and institutional investors, such as pension funds and companies, who wish to choose an investment option involving funds for collective investments operated and managed by professionals and in accordance with current legislation and supervision of such funds.

Term

The fund is an open-ended fund and has no maturity date. However, the manufacturer may decide to close the fund under certain circumstances. More information can be found in the fund's prospectus.

Other information

Depository: Arion banki hf.

Distributor: Arion banki hf.

Currency: ISK

The fund was established on January 12, 2011.

The fund is a capital growth fund. Dividends and other earnings from the fund's securities holdings are reinvested.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Risk factors that affect the product, but which the risk indicator does not consider, include counterparty risk, operational risk and liquidity risk. Other risk factors might exist. This product does not include any protection from future market performance so you could lose all of your investment.

Performance scenarios

Investment: 10,000 kr.

Favourable scenario	What you might get back after costs	12,456 kr	14,669 kr	18,187 kr
	Average return each year	25.0%	17.0%	13.0%

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest kr. 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Stefir hf. is unable to pay out?

If Stefir hf. becomes insolvent, there exists the possibility of incurring financial losses. Investors who have placed their funds with Stefir do not generally possess any legal entitlements to insurance protection, as per the provisions set forth by the law on deposit insurance and insurance schemes for investors. The custodian of the fund (Arion banki hf.) keeps the assets of the fund separate from the assets of Stefir hf. In the event of adverse outcome, there is a risk of losing the entire investment. Stefir encourages all its customers to acquaint themselves with the company's general disclaimer.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest kr. 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment: 10,000 kr.			
Scenarios	If you cash in after 1 year	If you cash in after 2.5 years	If you cash in after 5 years
Total costs	236 kr	550 kr	1,174 kr
